

Magner TBS-500 5 Pocket Note Counter

Magner TBS-500 5 Pocket Mixed Note Sorting System True one pass sorting & batching of all denominations using latest Japanese technology. Using pattern recognition and a series of high resolution image sensors, the TBS-500 makes light work of counting, sorting, facing, windowing and batching large amounts of mixed banknotes. The TBS-500 does not use costly gate motors and because sorting times are reduced there is much less wear and tear on moving parts.

Features:

- Value count and identify mixed notes at high speed
- Sorting of denominations
- Face and window notes in one simple step
- Easy operation
- Simple maintenance
- High performance and cost effective
- Height 580 x width 390 x depth 320mm
- Weight 30kg
